# Introducing Australia's Best Hook Latch !

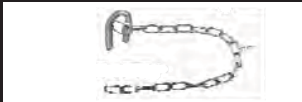

Rotech's design team have come up with this brilliant design that greatly increases the life of the spring hook latch. The unique shaped spring ensures that it can not be bent sideways like many other conventional latches of this nature. This spring design is protected by Registered Design and is only available from Rotech Gate Hardware and their distributors.

"IF ONLY THE BEST WILL DO"

**FEATURES:**

- ✓ Uniquely shaped locking spring closes around hook to resist sideways movement for superior strength and durability
- ✓ Extra robust wire, will outlast other springs
- ✓ Hot Dip Galvanized Chain - 5mm thick and 500mm long
- ✓ Guaranteed Stock Proof
- ✓ Gentle spring tension designed to allow even children to open gates
